

# SealBloc™

**Modular skirt** / Reinforced modular skirt  
for transfer points and longitudinal skirt

**100% COMPATIBLE WITH**  
SUPER-SCREW® / ISC™ / FIX'N GO®

# WHY CHOOSE THE SEALBLOC™ ?

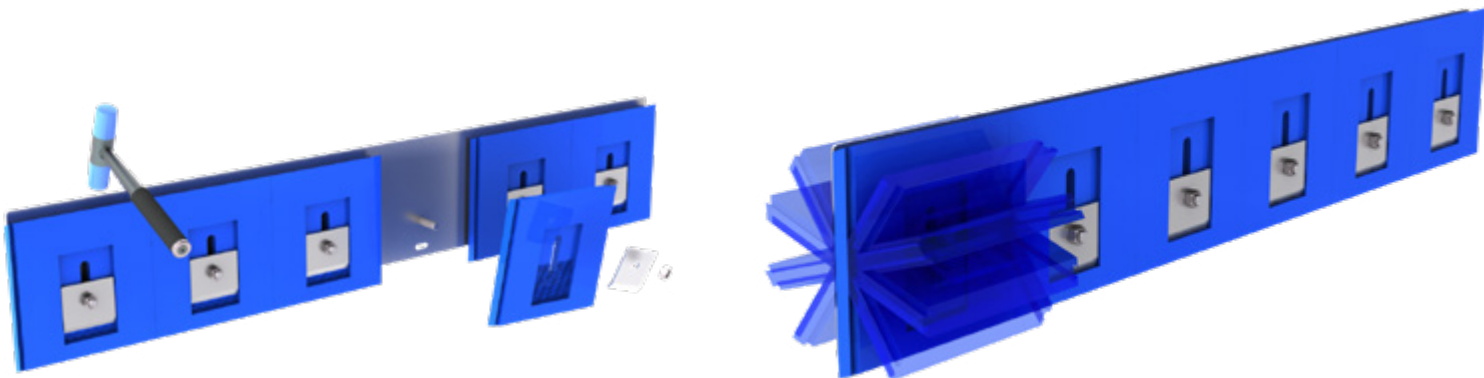

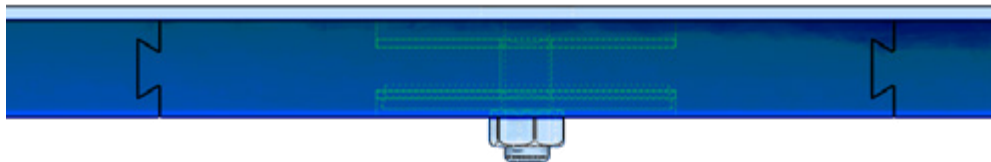

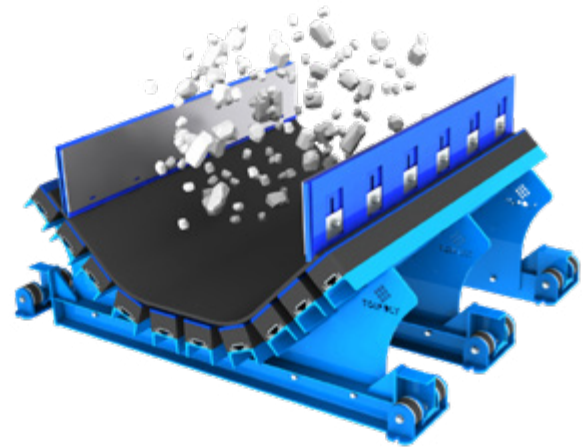

The innovative skirt that offers a perfect seal

**+** The modular skirt with simple, quick and sustainable maintenance

Skirt composed of bracing plate to be joined with anti abrasion rubber modules 200 mm by 5 (1000) or 6 (1200).

Compensation for wear with a simple hammer adjustment.

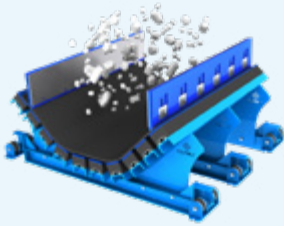

Only the totally used blocks are quickly replaced for a lower cost.

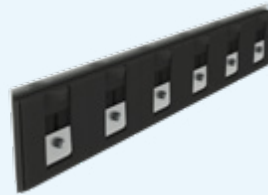

## ADVANTAGES

- Great robustness
- Optimum resistance to abrasion
- Significant improvement of sealing
- Fast replacement of worn blocks
- Very easy installation and adjustment
- Sealing between blocks insured thank to the dove tail profile

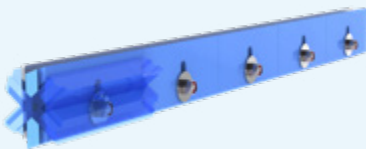

## OPTIONS, ACCESSORIES AND VERSIONS

Combines use with **Atlas™** cradle at transfer points allows a perfect sealing.

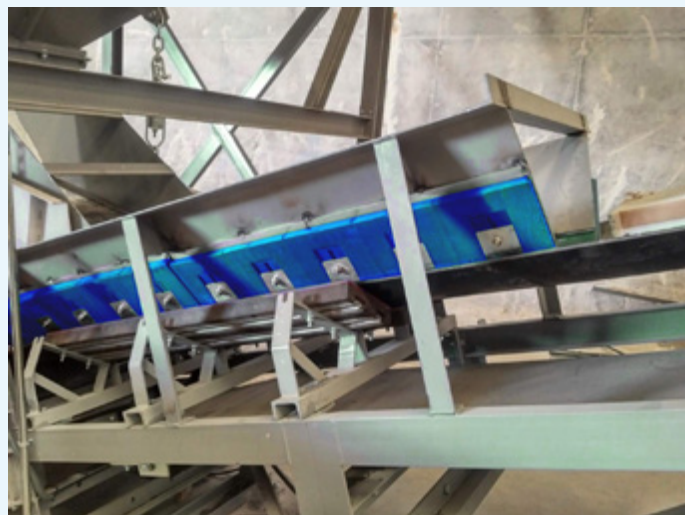

Also available in rubber, non reversible version.

Also available in reversible mini H100 version.
