

**G SERIES / RECORD V6**

**Splice / Heavy belt**

# SERIES G FASTENERS, WHAT IS IT ?

Series G fasteners are pre-assemble

**+** MLT is the designer of the G Series specially designed for rubber belt with a high thickness

The **G2000 series** fasteners with stand a high tension from **1400 to 3500 N/mm**.

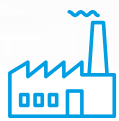

With reinforced ends, a constant radius, an easy introduction of the anti-wear axis, they are great to trim. They are ideally suited for high-strength conveyor belts

## ADVANTAGES

- Pre-assembled crampons
- Reinforced loop
- Chamfered edges : easy to splice junctions
- Fasteners are protected after peeling off the tape

## + Application domains

Heavy industries

Mines

Cement plants

Quarries and surface mines

## + TOOL WITH HAMMER

## + PNEUMATIC INSTALLATION TOOL

# RECORD V6 FASTENERS, WHAT IS IT ?

Metallic fasteners for heavy belt

**+** MLT is the inventor of the **RV6 fastener**, which withstands operating voltages up to **1050 N / mm**. It is perfectly suitable for conveyor belts **6 to 12 mm** thick, and provides a good troughing. Its flexible stainless steel polyamide shaft with **7 mm** diameter, guarantees a good tightening of the band, even if this one is used.

## ADVANTAGES

- Wide range of applications : 1 staple to join a thickness 6 to 12 mm (7/32 " - 15/32 ") band with
- Continuous length
- Pre-assembled galvanized crampons
- Good compression
- Very resistant

## + Application domains

Heavy industries

Mines

Cement plants

Quarries and surface mines

## + INSTALLATION TOOL WITH HAMMER

# G SERIES / RECORD V6
