Conveyor Solutions Expert

SELF-LOCK™ Fastener

PATENTED PRODUCT

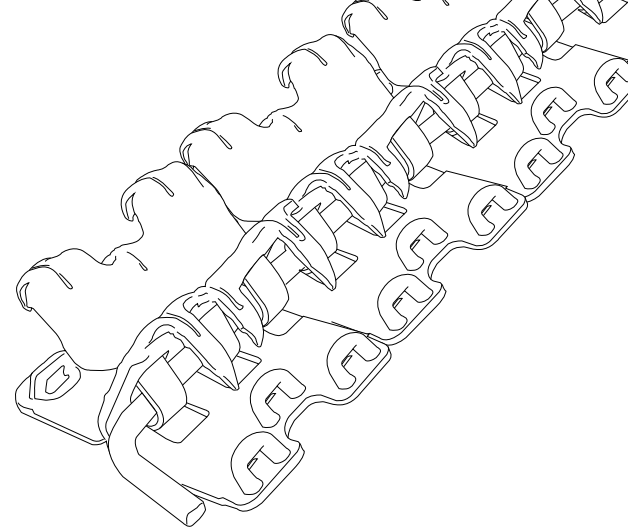

MADE IN FRANCE

Splice / Light duty belts

SELF-LOCK™ fastener, what is it ?

A flat fastener for light duty belts

Patented fastener for light duty belts

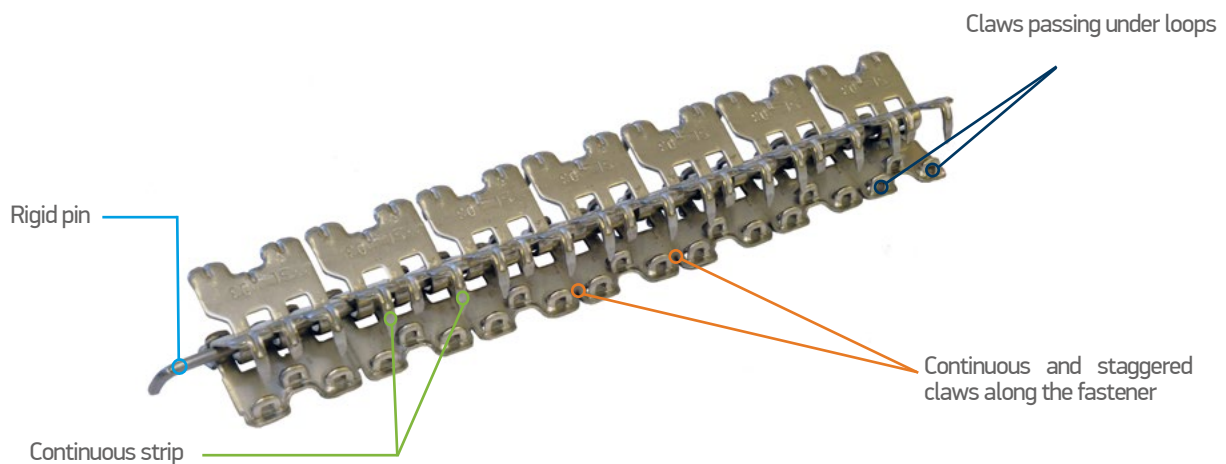

Self-Lock™ fastener is developed and patented by **MLT**. Its efficiency and ease of installation **Self-Lock™** a major innovation in the Light Duty industry.

As the name suggests - the fastener is installed with claws that close back on themselves through a bottom loop : self locking. This design facilitates cleaning. Continuous claws avoids contamination from the transported product because they are within the belt.

The **Self-Lock™** has a low profile with strong belt compression.

Available in 4 sizes of fasteners, **MLT** offers you 2 installation tools for the **Self-Lock™** range :

- 1 manual tool with hammer
- 1 pneumatic tool, suitable for industrial use : **the MLT QUICK DRIVER™**

ADVANTAGES

- Fast to install
- 1-step installation of your fasteners
- Grips the belt with strong compression
- Improved cleaning
- Low profile and sleek finish
- Adapted to bare back belt
- Available in stainless steel
- Rigid pin

SELF-LOCK™ fastener, efficient in emergency situations

Easy and fast to install !

+ Application domains

Agriculture

Packaging

Food industries

+ Manual installation tool

Characteristics :

- An installation tool equipped with a punch and a hammer and an installation guide (available in 300, 600, 900, and 1200 mm)

Advantages :

- Splice large belts
- Very easy to use
- Simple Hammer Tool only required

+ MLT Quick Driver™

Characteristics :

- A complete kit equipped with a Chisel hammer, 2 heads and a punch : **Self-Lock™** et **Mini Record™** (installation tool should be ordered separately).
- Reduced weight : about 2 kg equipped
- Energy : pneumatic
- Ergonomic
- Adjustable power

Advantages :

- Versatile : allows **Self-Lock™**, but also **Mini-Record™ (MR™)** fasteners
- Optimum user comfort
- Compact and lightweight
- Compatible with other market devices
